Bergen - Classic Business Multi-Purpose PSD Template by Milothemes

Bergen it's a classic business template, designed with love, for themeforest. Take a minute and browse through it's clean, colorful & smooth pages, with a modern design approach to a business classic structure.

After seeing Bergen you will realise that one template is all you need for your business, either a startup or a large company.

Hello and thank you for buying this PSD Template.

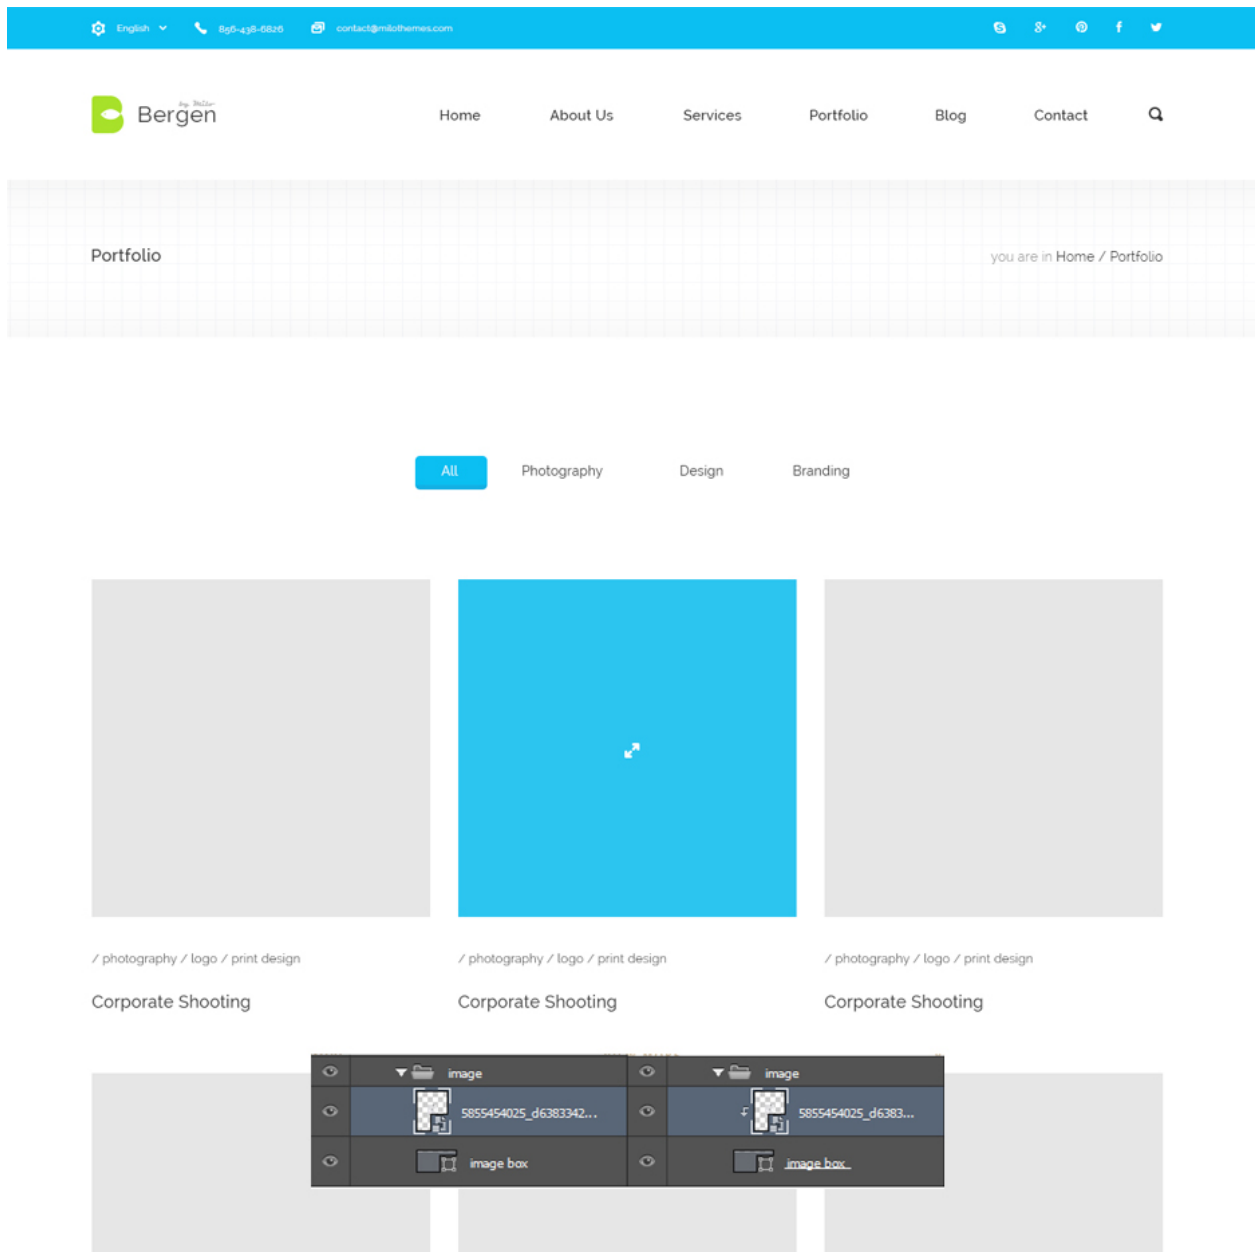

If you want to make any change to these documents you must use Photoshop to open the files. Below are a few important guides on how to replace the pictures, change the colors or add elements to these files. If there is any information that you don't understand or find in this document, don't hesitate to contact us. We are very happy to offer you our support.

Template by Milothemes.

1. Change the place holders with pictures.

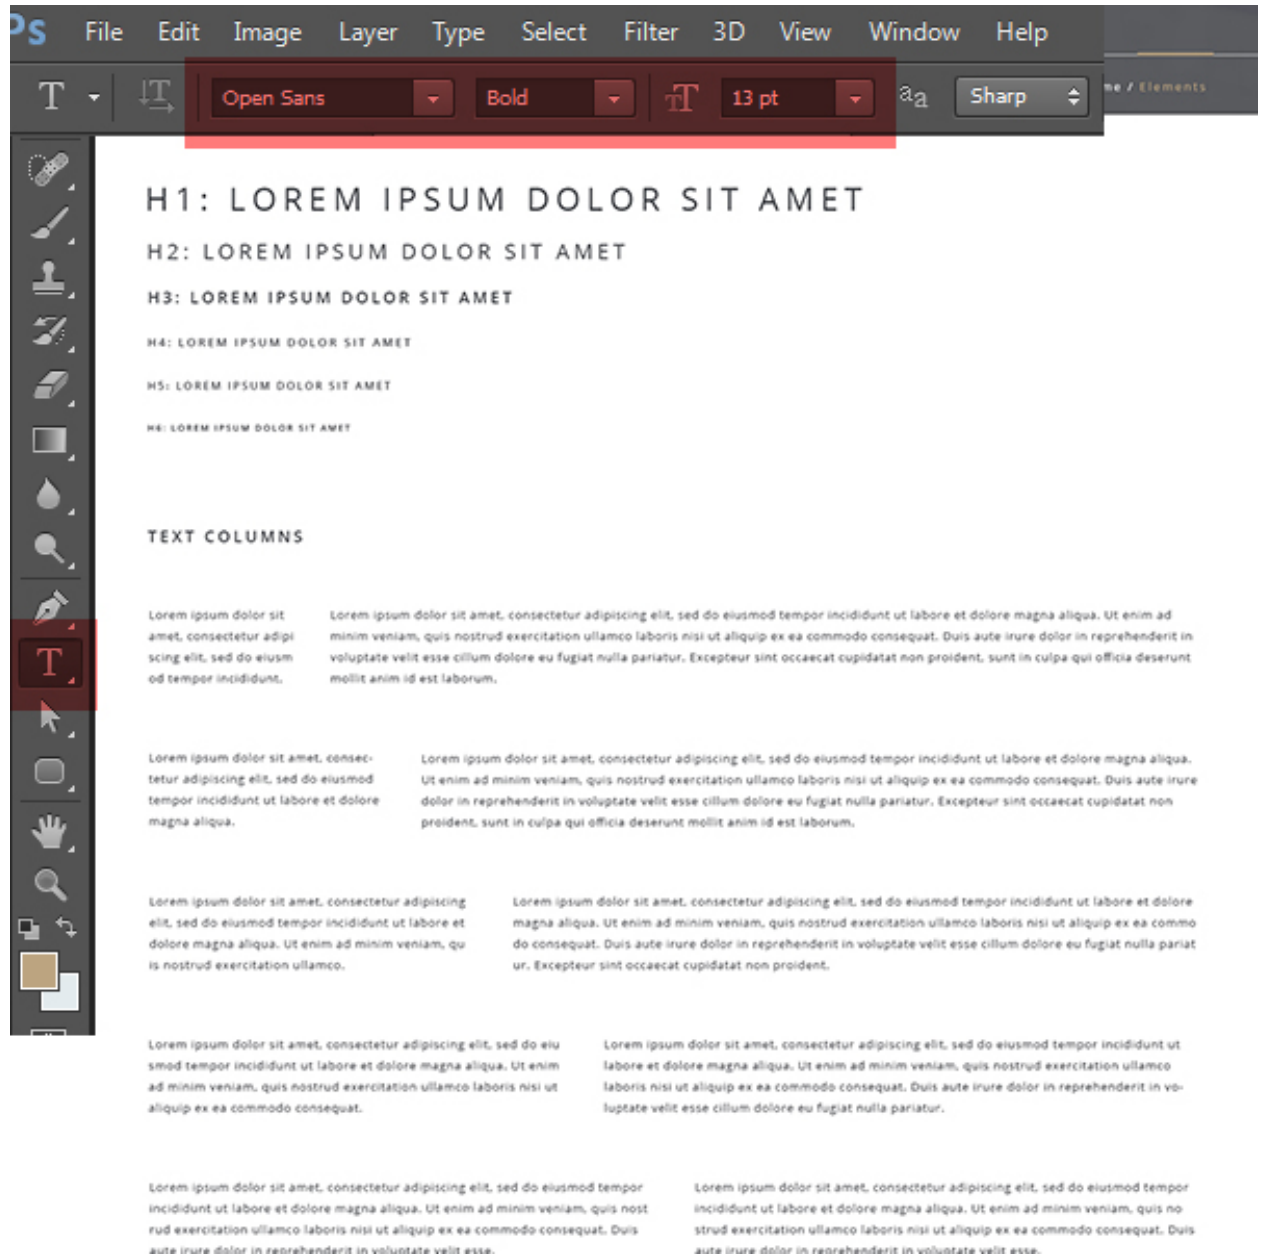

All place holder layers in this template are named “image box”. To add a photo to this image box you just have to drag and drop a picture into the PSD file and clip it to the “image box layer”. You can do this by pressing the cursor between the two layers and hold the ALT key. Another method is to go to the image layer , press the right key on your mouse and select “create clipping mask”. See the images below .

2. How to increase/decrease or change the font.

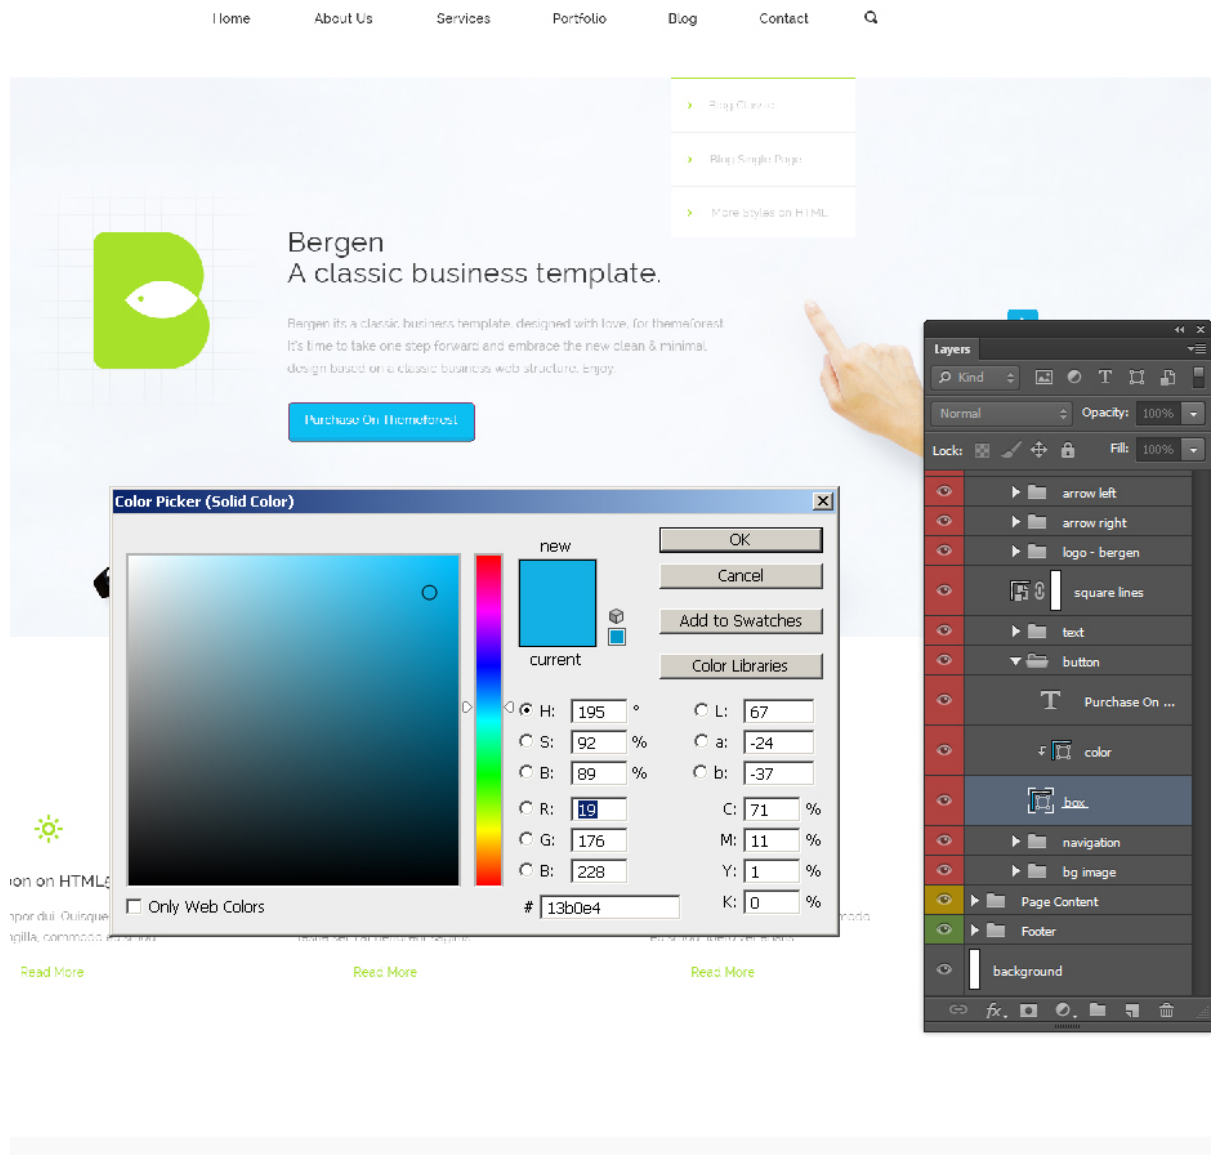

If you want to change the font size, just hit the T icon in Photoshop and change the pixels size. See the image below if you have any problems.

Template by Milothemes.

3. How to change the colors.

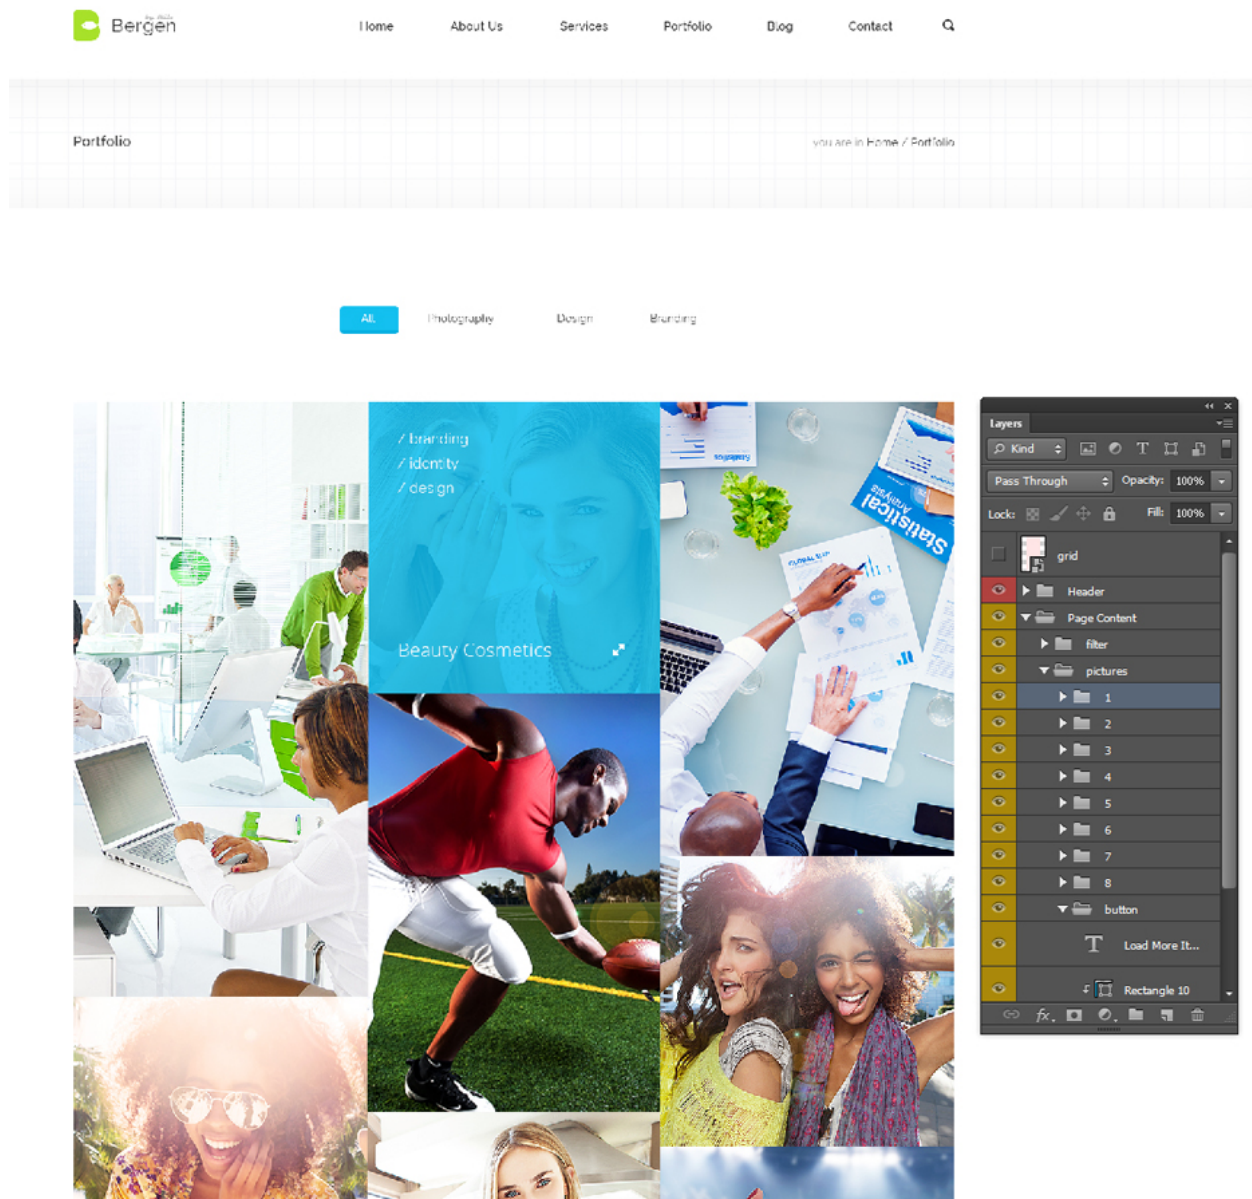

If you want to change the 2 main colors in the template you have to select the shape layer you want to change, double click on the layer and when the color palette appears, select the color you want.

Template by Milothemes.

4. How to remove or add elements into pages.

Adding elements is very easy, just select the folder you want and drag and drop it into the file you build. If you want to remove the element just select the folder and press delete.
